67 FREIGHT TRAINS REQUIRED TO MOVE REYNOLDS' BIG BUY

An Idea of the Magnitude of the Purchase Reynelds Made From the Ce-Operative Association This Week Is Given.

Some iden of the mingnitude of the donl by which the R. J. Reynolds Tobacco Company takes over practically all the holdings of the 1921 erop ln the hands of the Burley Tohaeco Growors' Co-operative . Association may be gathered from figures given out hy Warehouse Manager Robert E. Beatty, of the Lexington district,

Manager Bentty said that It would require 67 freight trains, of fifty ears tucky Odd Follows - Grand Master each, to carry the 54,000,000 pounds sold, that the tobacco would fiil 3,375 standard freight cars, and that, if the hogsheads containing it were placed end to end they would reach for a dlstance of more than fifty mlles.

Official figures from the department of agriculture at Washlagton, received which is much sought from year to in Lexington, show that the hurley year. crop of 1921, not counting the association sales, averaged 9 coats a pound SHIE THOUGHT TO BE more than that of 1920, as it brought 22.3 cents a pound, as compared with 13.37 cents a pound for the 1920 crop. This was pald in spite of the fact that the 1921 crop was inferior to that of 1920. According to the department report the linerease was due to the aday, seems to open the way to solvlag movement to market tobacco co-opera-

THE ACHIEVEMENTS OF CONGRESS

Two outstanding achievements can be crediated to the Sixty-Seventh Congress, the second session of which has just been adjourned.

Income of the Government was increased. Expenditures were made smalled. Yet, as a middle and apparently impossible feat, numerous new undertakings, long needed as phases of modern and wise governments' functioning, were provided for, with accompanying appropriations for their maintainance.

One of these was for the loaning of money to farmers to obtain seed. Another was for the distribution of Russian relief funds. More money was provided for river and harbor improvement, and for the further development of the Government's great industial undertakings at Musele Shoals. The patent office was reorganized and its thing new. facilities increased. Twenty-five additional Federal judges were provided, making the work of Government courts more readily disposed of without danger of lessening consideration.

However, these were but a fe wof the things Congress did in the ten months of its sessiou. As few earlier Congresses have been able to do, the Sixty-Seventh almost compassed the world with the influence of its work. It provided for the "scrapping" of American naval vessels in conformity with the decisions of the conference on the limitation of armaments. It reduced the personnel and expenses of this year and it is also noticed that army and navy, yet in a way which doubtless will increase the effi- there are not so many new automociency of each arm of the republic's system of defense. Co-operative hites. markets for farmers were authorized. Regulation of trading in grain futures was made possible. A commission for the funding of the Allie Powers debt to America was created.

Yet vast net economies were brought about. Thousands of Government employees were removed from the pay-rolls through reorganization methods which made their further retention unnecessary to increased betterment of the work they had been doing. National expenditures were reduced a billion dollars yearly, and the tax burden was also lessened an equal amount. Moreover, the public debt was reduced by \$1,000,000,000 for the year, and there will be a surplus in the national treasury at the close of the fiscal year for the first time since 1916. The adoption of the budget was of itself a worthy session's work.

And, paralleling magnificently the splendor of these achievements is the enactment of a new tariff law which, while it gives thoroughly American safeguarding of every legitimate business interest of this country, provides for a natural adjustment of the cost of licing while insuring American standards of industry and of existence. Not all was done by Congress which needed to be undertaken. Some of the legislation enacted was far from perfect in its form. In a remarkable degree, however, the work of the Sixty seventh Con- pearance and who supposedly commitgress was performed in the face of such difficulties as seldom before ted suicide because he thought his wife confronted American lawmakers. MR. GOMPERS PROTESTS.

Samuel Gompers has sent a eablegram of protest against the reported Turkish atrocities in Europe, denouncing them as terrible and barbaris. This is commendable on Mr. Gomper's part but it is decidedly unimpressive for the reason that he has so far ignored protesting the even greater atrocity at Herrin, Ill., and by his silence has given it his sanction and approval. Indeed, only two or three weeks ago one of his prominent subordinates, Farrington, of Illinois, publicly declared in an authorized interview that any union man accused of participating in the Herrin massacre would be defended to the limit of the funds of the union. No discrimination was made and the country was given to understand that though the accused men might be blackly guilty and manifestly guilty they would still be defended by their "comrades and brothers." It is this sort of thing that rankles in the bosoms of decent people and which brings Mr. Gompers and his associates into odium. Before Mr. Gompers goes to protesting the Turkish outrages, it would be well for him to see to it that those under his control are not guilty of acts just as brutal and just as barbarie.—Fort Wayne News.

The American Federation of Labor named October 1 as "Impeachment day" but earefully stated that it was the impeachment only of Mr. Daugherty and Judge Wilkerson, thus relieving the fear that included in the list might be the judge, sheriff and other officials at Herrin, Ill., and also Governor Len Small. The convention adjourned too without providing any funds for prosecuting those guilty for wreeking trains and killing union train erews .-- Fort Wayne

It is announced from Marion, Ill., that the "Williamson county jail has been refurnished and an entire tier of cells remodeled to house the miners indicted by the grand jury in connection with the Herrin massacre." The jails everywhere ought to be put in order for lynchers, and lynchers everywhere put in the jails. The country in every way, would greatly benefit.-Washington Star.

While the country is undunbtedly opposed to a large standing army and to every phase of militarism, yet the majority of the peopie will imlorse the sentiment voiced by President Harding a few days ago when he declared there should be 100,000 young Americane instead of 28,000 in the reserve officers' training camps. - Houston Post (Dem.)

"Kept us out of European entangiements" would not be a bad slogun, along with others, for the coming Republican campaign.

SIX PECKS AN ACRE FOUND

Lexington, Ky. - Plantings made at he rate of six pecks of seed an acre have given the best wheat vields on the Kentucky Agricultural Experiment Station farm where experiments have been conducted for many years to determine the hest rate of seeding in Kentucky, according to E. J. Kinney, a member of the station agronomy department. This amount is sufficient in nearly all cases hut to sow less pecks an acre of seed from this variety than slx pecks an acre is only advisable where the soil is extremely rich or the seedings made very early in the season. The statement was made in response to scores of inquiries being received at this time of the year from farmers in all parts of the state who are making preparation for wheat

"Some years, five pecks of seed an acre have given yields just as large as bose obtained from six pecks of seed but in no case have the yields from the smailer amount of seed ben larger. On very rich tobacco land, four pecks of seed an acre occasionally have given yields as large as linese from other rates of seeding. However, on corn iand where wheat does not atool so readily, seedings made at a lower rate than six pecks an acre practically never have given vielda quito as large

OVER FOUR YEARS LATER, Mr. der most conditions, this rate, of seedforries said: "I sm the same strong ing will give practically a full cropbellever in Doan's Kidney Pills. I have had no trouble with my kidneys since tensively when sown thin but is more renommending Doan's."

The institution of the chop house has passed in New York. The superficial observer blames it upon probibition: hut the melancholy old-time chophouse patron scoffs at this as a complete explanation. "It's the women!" he deelares. "Women are everywhere those days. They eat everywhere just as they work everywhere. A chophouse was a man's eating place. The food, the atmosphere, the discussions, were all the kind men like. Now every restaurant keeper eaters to women in his choice of menu. Women never did appreciate good thick mutton chops. And the whole atmosphere of the old chop houses has disappeared along with the limited bill of fare. Women's entranco into tusiness has killed the institution."

Pastures and Seeding of Winter Wheat and Ryc, Says Crop Report,

A summary of weather and crop conditions in Kentucky for the week ending Tuesday, October 10, 1922, fol-

The first five days were unsessenably warm, but the week ended with tomperatures considerably below normal. Good showers, occurring generally over the state near the end of the week, caused improvemnt in pastures and insured germination of grain and alfalfa that have been sown recently. Considerable wheat and barlcy were sown during the week, hut most of it was done in corn stubbic; as the soil has continued too dry for much progress with piowing. Germination has been unsatisfactory, some graiu dying soon after sprouting. Bctter resuits are now possible in seeding and soil preparation; but considerabiy more rain is needed to thoroughly soften the ground, also for pastures, clover, alfalfa, and for replenishing stock water. Cutting late corn and housing late tobacco is nearly finshed. Conditions have ben excepionally favorable during the period of barvest for drying out the corn and curing tobseco. As a result corn will be ready to erib earlier than usual, and the color and quality of tobaceo has been improved. Some late notatoes that are still green will be beneted by the rains; but the high temperature of the last ten days caused premature drying of the plants and a lessening of the yield. Considerable sorghum is also in the field; otherwise crops are safe from frost injury.
